A Trusted Bridge Between Markets

SİLKORA GROUP is an Istanbul-based international trade company inspired by the spirit of the historic Silk Road. We connect high-quality Turkish manufacturing with buyers, contractors and project developers worldwide — delivering complete product packages, reliable logistics and long-term partnership.

With more than two decades of foreign trade experience and collaboration with over 30 partner factories in Türkiye, Silkora officially unified its local and international network in 2020. Our headquarters in Istanbul sits at the crossroads of Asia and Europe — a strategic advantage for multi-sector sourcing under one roof.

Partner Factories

Mission

To deliver the highest quality products at competitive prices and on schedule — becoming a trusted partner in international trade, with a growing focus on energy infrastructure and power solutions for emerging and established markets.

Vision

To be a preferred regional and global brand in energy equipment trade and building materials export — recognized for reliability, technical depth and multi-sector capability.

Core Values

Quality

International standards across every product line and shipment.

Reliability

On-time delivery, transparent communication and lasting partnerships.

Innovation

Continuous alignment with modern energy and industrial technologies.

Customer Focus

Tailored sourcing packages for each project and market.

Powering Projects Across Borders

Energy is the strategic priority of Silkora Group. We supply a complete range of power generation, conversion and distribution equipment for residential, commercial, industrial and utility-scale applications — supported by Turkish manufacturing partners and international quality benchmarks.

From backup power to renewable systems and grid infrastructure, we help clients source, configure and export energy packages with documentation, logistics and after-sales coordination.

▣ Generators

Diesel and gasoline generators for residential, commercial and industrial backup or continuous power. Scalable capacities for construction sites, facilities and critical operations.

▣ Solar Panels & PV Systems

High-efficiency photovoltaic modules and solar system components for rooftop, commercial and industrial installations — enabling clean, cost-effective electricity generation.

▣ Wind Turbines

Wind energy equipment and related components for renewable projects seeking diversified power portfolios and long-term sustainability targets.

▣ Transformers

Distribution and power transformers for energy transmission and conversion — essential infrastructure for industrial plants, networks and large facilities.

▣ Power Plants

Equipment and supply solutions for electricity generation facilities, supporting EPC contractors and investors in power plant development and upgrades.

▣ Electrical & Lighting Equipment

Electrical panels, cabling, switchgear and indoor/outdoor lighting systems for buildings, campuses and industrial environments.

Ideal for: EPC contractors · Distributors · Government & institutional tenders · Industrial facilities · Real-estate & infrastructure developers

One Address. Multi-Sector Capability.

Beyond energy, Silkora offers a diversified portfolio so buyers can consolidate procurement. Complementary categories strengthen project packages — especially for construction, industrial and hospitality developments.

Construction & Building Materials Aluminum doors & windows, ceramics, marble, interior/exterior doors, elevators, sanitary ware, kitchen & closet systems, roofing and decorative materials.	Machinery & Automation Industrial machines, automation (PLC/SCADA), factory equipment and printing machines for production facilities.
Automotive & Heavy Equipment Automotive spare parts and construction heavy machinery supply.	Sports Equipment Fitness and professional gym equipment for clubs, hotels and wellness projects.
Games & Entertainment Children's playgrounds and safe outdoor play solutions for parks and residential compounds.	Food Products Premium olive oil, nuts and selected food exports for retail and wholesale partners.

- 1. Requirement Analysis — We clarify technical specs, target markets and delivery timelines.
- 2. Sourcing & Quotation — Matched with verified partner factories; competitive, transparent offers.
- 3. Quality & Documentation — Inspection coordination, certificates and export paperwork.
- 4. Logistics & Delivery — End-to-end shipment planning to destination ports or sites.
- 5. After-Sales Support — Ongoing communication for spare parts, expansions and new projects.

Let's Build the Next Project Together

Whether you need a full energy package, a construction materials container program, or a multi-category tender supply — Silkora Group is ready to act as your reliable partner in Türkiye.
